

Today, I reached the subtle region especially carrying news of the countries abroad. What did I see today? BapDada was standing just ahead. There were rays of the different powers emerging through Baba's eyes and His forehead spreading across the world, just like a lighthouse. I too came close to Baba whilst experiencing a powerful stage, equal to that of Baba. For some time, I was lost in that experience. After that, Baba said: Child, what are you seeing? BapDada has so much love for His innocent, weak children who don't have any knowledge. Children should be benefited by receiving even a drop of something or another. BapDada has given all of you children the seat of benefiting the world in the same way as the Father is doing, because you children are also the Father's companions, the world benefactors. Your occupation of the confluence age is to benefit the world. And you know that benefit for the self is merged in this.

After this Baba asked: Child, what news have you brought: I replied: Baba, today Mohiniben and her companion Gayatriben and also Dadi Janki and Jayantiben have shared very good news and they are very happy with the success of service. BapDada had given a signal to bring closer the loving and co-operative souls by having programmes and to make them instruments for service, to make them into mikes. With this aim, the sisters have invited all the Call of Time participants from the different countries to especially give them sustenance of gyan and yoga. As a result 35 souls have come. They were given the course of the original knowledge of the experience of the soul and the Supreme Soul.

It was seen that everyone had very good experiences and themselves offered to make plans for service. Everyone was very happy. In this way, they will become the instrument mikes. Hearing this, BapDada smiled very sweetly and said: Children have taken up this project with courage and tirelessness. So the fruit of courage and enthusiasm are always the best of all. BapDada is giving blessings from the Heart to the children who are instruments for this service. Every now and then many situations came, but you still attained success. Wah, children, wah! It is the speciality of daughter Mohini that whatever task she becomes an instrument for, she will accomplish that task successfully. From childhood, she has received the blessing of success. Together with her, Gayatri and the other companions have deep love in their heart for Baba. And this is why as sustenance of their love, these children continue to receive incognito co-operation. Child Jayanti has also been giving very good co-operation from her heart. She is the long-lost and now-found child of Sakar Brahma Baba from her birth and has received a blessing for service. BapDada is giving multimillion fold congratulations to each of the souls who are instruments for service, personally by their name and speciality. Together with this, Baba is also giving remembrance to all the children who are instruments for the Global Retreat Centre. You refresh and make all the people with love and give happiness to those who come in every group. The name of Manda is being mentioned as the instrument, but BapDada knows that every sister and every Pandava is bringing very good results of service. BapDada is very happy.

Now according to the time, BapDada is saying to all the children everywhere: You have done a lot of service everywhere. Now, bring together as a group, all the service that has been done everywhere and bring the loving and co-operative souls close in the gathering. No matter which profession they belong to, feel their pulse, have a gathering and help them move forward. Then the result of service will become very clear and they will become co-operative in service. Each child is doing a lot of service, but now extract the butter of service. Prepare groups, it is from them that you will be able to make the mikes and heirs emerge. BapDada has given this year the blessing "Use everything in a worthwhile way and success is guaranteed". So children, the treasures of i) elevated thoughts, ii) time, iii) powers, iv) virtues and v) knowledge are very special. As a master bestower, use these in a worthwhile way. Then you will easily and automatically be able to experience success for the self and in service. It is through this that you will experience yourself to be free from obstacles. Secondly, because your mind and intellect remain busy in this, you will be liberated

from trivial matters. Thirdly, because you give to others, you will accumulate in your account of charity. There is benefit for the present and also the future. Therefore, through this service, you will experience yourself to be a master bestower, a soul equal to the Father in a practical way. By revealing yourself in this way, you will easily be successful in revealing the Father.

Saying this, BapDada remembered all the double foreign children with a lot of love and deep affection from His heart and said: Look, My children, you do double service, that of your lokik job and that of spiritual service, with so much courage and enthusiasm. Even whilst being in an atmosphere of Maya, you remain detached and loving to the Father. Every day at amrit vela, BapDada gives all the double foreign children the blessing: May you be constantly victorious, May you constantly have a right to self-sovereignty, May you have a right to the future kingdom. Give all the double foreign children, lots, lots and lots of love and affection from the heart personally by their name and speciality. Whilst Baba was saying this, I reached the corporeal world. Om Shanti.
